- Female gender
- Early puberty
- Difficult temperament: inflexibility, low positive mood, withdrawal, poor concentration
- Low self-esteem, perceived incompetence, negative explanatory and inferential style
- Anxiety
- Low-level depressive symptoms and dysthymia
- Insecure attachment
- Poor social skills: communication and problem-solving skills
- Extreme need for approval and social support
- Low self-esteem
- Shyness
- Emotional problems in childhood
- Conduct disorder
- Favorable attitudes toward drugs
- Rebelliousness
- Early substance use
- Antisocial behavior
- Head injury
- Marijuana use
- Childhood exposure to lead or mercury (neurotoxins)
- Parental depression
- Parent-child conflict
- Poor parenting
- Negative family environment (may include substance abuse in parents)
- Child abuse/maltreatment
- Single-parent family (for girls only)
- Divorce
- Marital conflict
- Family conflict
- Parent with anxiety
- Parental/marital conflict
- Family conflict (interactions between parents and children and among children)
- Parental drug/alcohol use
- Parental unemployment
- Substance use among parents
- Lack of adult supervision
- Poor attachment with parents
- Family dysfunction
- Family member with schizophrenia
- Poor parental supervision
- Parental depression
- Sexual abuse
- Peer rejection
- Stressful events
- Poor academic achievement
- Poverty
- Community-level stressful or traumatic events
- School-level stressful or traumatic events
- Community violence
- School violence
- Poverty
- Traumatic event
- School failure
- Low commitment to school
- Not college bound
- Aggression toward peers
- Associating with drug-using peers
- Societal/community norms about alcohol and drug use
- Type of Factor
  - Risk factor
  - Protective factor
- Disorders
  - Depression
  - Anxiety
  - Conduct disorders
  - Substance abuse
- Sources of Risk/Protective Factors
  - Individual
  - Family
  - School/community

---

### EARLY ADULTHOOD

- Early-onset depression and anxiety
- Need for extensive social support
- Childhood history of untreated anxiety disorders
- Childhood history of poor physical health
- Childhood history of sleep and eating problems
- Poor physical health
- Lack of commitment to conventional adult roles
- Antisocial behavior
- Head injury
- Parental depression
- Spousal conflict
- Single parenthood
- Leaving home
- Family dysfunction
- Decrease in social support accompanying entry into a new social context
- Negative life events
- Attending college
- Substance-using peers
- Social adversity
- Identity exploration in love, work, and world view
- Subjective sense of adult status
- Subjective sense of self-sufficiency, making independent decisions, becoming financially independent
- Future orientation
- Achievement motivation
- Balance of autonomy and relatedness to family
- Behavioral and emotional autonomy
- Opportunities for exploration in work and school
- Connectedness to adults outside of family
- Urban setting
- Poverty
- Associating with deviant peers
- Loss of close relationship or friends
- Positive physical development
- Academic achievement/intellectual development
- High self-esteem
- Emotional self-regulation
- Good coping skills and problem-solving skills
- Engagement and connections in two or more of the following contexts: school, with peers, in athletics, employment, religion, culture
